MOBILE-SHREDDERS

WHEN YOU CAN'T BE STATIONARY

Moving materials from one place to another can be a costly proposition, so why not move the processing machinery to the material instead? Mobile advantages can include on-site product destruction services critical to some of your clients, volume reduction which increases payloads that reduce transportation costs, and cutting down overall project costs since you may no longer need to store materials on your property.

WHY SSI MOBILE?

- A full range of solutions
- Cost effective, easy to operate
- Low horsepower, energy efficient
- Diesel and electric powered options
- Batch or conveyor-fed options
- Wear-resistant cutters
- Low-speed benefits—low noise, low dust, low heat generation, low operation and maintenance costs
- Minimal “fines” generation

ANYWHERE, ANY APPLICATION

Whether you operate a contract shredding business or just need a machine that is completely self-contained, SSI has the experience to develop the perfect solution for your needs. Our mobile machinery is typically borne from a customer requirement and developed around a specific set of application criteria. We have built trailer, track and skid mounted shredders, and primary waste reducers that have been employed in some of the harshest conditions on the planet such as the icy plains of Antarctica and the deserts of Saudi Arabia.

WHAT **NEEDS** SHREDDING?®

SSI Shredding Systems has provided effective solutions for a wide array of shredding applications from hazardous waste to tire shredding, from metals to plastic and from demolition debris to e-scrap. SSI's goal is to help you find the right solution to fit your goals and needs.
